Subject: RE: French Limited Post-Hurricane Harvey Site Assessment

Caught one more little detail. The Site is referenced as French Unlimited instead of French Limited on the Harvey Webpage.

Have a good weekend Raji!

Kind regards,
Fay

Thanks Fay

Will give the Harvey team the change and alert them to the Harvey Webpage date.

Subject: RE: French Limited Post-Hurricane Harvey Site Assessment

Hi Raji – I just caught an error in my email regarding the date referenced for the French Limited sampling. It was performed on Tuesday September 12, not September 9, 2017. I have fixed the error below. I was just on the EPA's Harvey website and noticed the sampling date in the EPA's summary is also referenced incorrectly as September 13. Just wanted to correct our error and point out the other one as well.

Kind regards,
Fay

Subject: RE: French Limited Post-Hurricane Harvey Site Assessment

Dear Raji,

As per the EPA's request, ERM is providing a data usability review of the analytical results from soil and ground water sampling performed at the French Limited Superfund site on September 12, 2017. The data review is consistent with the level of review performed for the annual ground water monitoring program and meets the quality assurance and quality control (QA/QC) standards established in Appendix C of the Site's 1996 Closure Plan.

ERM reviewed ALS Laboratory's report for work order# H517090558 for one groundwater (and duplicate) and one soil composite sample (and duplicate) collected from the French Limited Superfund Site in Crosby, Texas. The laboratory that conducted the analyses is NELAC accredited under the Texas Laboratory Accreditation Program for all the methods, analytes and matrices reported. The data have been reviewed and are technically compliant with the requirements of the methods used. Any problems or anomalies observed by the laboratory have been identified by the laboratory in the Laboratory Review Checklist (LRC). The data are of sufficient quality for its intended use.

Kind regards,
Fay

Fay

One quick questions. Do you have an independent validated summary or report you did for the lab data? Can you send it to me please? They would like to post that along with the lab-validated sampling results on the Harvey website.

Hi Raji – Please find attached a summary report for the Post-Hurricane Harvey sampling event performed at the French Limited Superfund Site. The document contains the final analytical report from the laboratory. Please feel free to contact us if you have any questions.

Have a good weekend!

Kind regards,
Fay
